Note: AutoCAD is used primarily for two-dimensional (2D) drafting. Disclaimer: Autodesk assumes no liability for errors in this document, including errors in math, translations, spelling, or fact-checking. Related Topics: Required System Software A version of Windows or a compatible operating system running Windows 3.1 or later. AutoCAD runs on a Windows 9x/NT/2000/XP/2003/7/8/8.1/10 operating system. For example, a Windows 7 will work with AutoCAD 2016, but not with AutoCAD 2017 or earlier. AutoCAD may not run with a different version of Windows. Optional System Software If you plan to connect AutoCAD to a scanner, the following is a list of the scanners that will be compatible with the products you purchase. Note that support for the listed scanners is included with AutoCAD LT, not with AutoCAD Standard or Enterprise. If your scanner is not listed, it will not be compatible with any version of AutoCAD. Supported Scanner Models Autodesk recommends a flatbed scanner. Flatbed scanners may also be used with photocopiers. Scanners generally use optical lenses to project the scanned image onto the sensor. Some scanners use CCD technology instead of optical lenses. All scanners have the following features: Copy and storage: An image may be stored in a computer's hard drive or in a network drive. Cropping: An image may be cropped to suit the needs of a certain project. For example, a small drawing may be cropped to fit in the space on the scanner bed. Rotating: Rotating an image is not required, but if it is desired, you may adjust the angle of the image so that it fits on the scanner bed. Scanning with a Networked Scanner With AutoCAD Standard, Enterprise, or LT you may scan drawings and have them stored as files. For more information about using networked scanners in AutoCAD, see the "Use Networked Scanners" chapter of the AutoCAD LT or AutoCAD Standard installation guide. Support for Memory AutoCAD allows up to 3GB of memory to be installed in a computer. AutoCAD Standard and Enterprise support up to 8GB of memory, and LT supports up
