Online sources (Social Sharing, Bookmarking) SoftSTM Software Group (Group Owner) Category:SimulationQ: node.js, how to pass a parameter to a route? I am new to nodejs and I have the following route: exports.search= function(req, res){ var collname=""; collname=req.body.input_field_name; res.send(collname); } When I click on the submit button, I want collname to be passed as a parameter. How can I do this. A: You should put your variable "collname" as an argument, so the URL would look like this: to send a POST request, use this code: var express = require('express'); var app = express(); app.get('/search/:param1/:param2/:param3', function(req, res) { console.log(req.params); console.log('params:'+ req.params.param1 + '/' + req.params.param2 + '/' + req.params.param3); //etc. }); app.post('/search/:param1/:param2/:param3', function(req, res) { console.log(req.body); console.log("body:'+ req.body.input_field_name); //etc. }); app.listen(8000, function() { console.log('Express server started on localhost:8000'); }); Make sure to properly escape the URL (make it a valid URL). Also, try to use res.send(collname) to send the string instead of res.send(collname) Hope this helped! Q: Return the name of the mapped input in C I'm trying to write a program in C that reads a string (the name of a file that was mapped by the read function), splits it, and stores each line as an array. However, my issue is that I don't know how to retrieve the name of the input 3da54e8ca3
